DETAILED ACTION

1. Upon further consideration of the restrictions mailed on 9/6/02 it was determined that an error was made in the restriction; a new restriction is being issued. Therefore, the remarks pertaining to the elections of the restriction mailed 9/16/02 are moot in light of the new restriction.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 are drawn to the method of positioning a sensor, classified in class 29/598
- II. Claims 11-18 are drawn to a Stator Assembly, classified in 310 subclass 254
- III. Claims 19-24 are, a Rotor Position sensor, classified in class 310, subclass 68.

3. Inventions I, II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claim can made by a materially different process such as mounting the sensor to the stator cap via screws or press fitting.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that

the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the position sensor of the group1 can be made with out the stator assembly. The subcombination has separate utility such as electric motor, and electric motors having snap connection.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen B Addison whose telephone number is 703-306-5855. The examiner can normally be reached on 8:00 to 4:30.
